

MedECC Special Report

Environmental change, conflict and human migration

Table of contents

1 Introduction, background, motivation

Executive summary

1.1 Motivation to write the Special Report

1.1.1 Why consider the relationships between climate-and environmental changes, migration and conflicts?

1.1.2 Why focusing on the Mediterranean?

1.1.3 The climate/environmental change-conflict-migration-nexus

1.2 What are the main issues addressed and how is the report structured

1.2.1 What is the overall scope and content of the report?

1.2.2 The science-policy context of the present report for the Mediterranean

1.3 What are the key issues/conclusions to be drawn?

1.4 Background and process of drafting of the report

1.4.1 Brief introduction of MedECC

1.4.2 Nature of this report, methodology and process of writing

2 Scope and Setting

Executive summary

2.1 Definition of key terms to be used

2.1.1 Human mobility and its different forms

2.1.2 Other important definitions

2.2 Spatio-temporal scopes of the report

2.2.1 Geographical scopes

2.2.2 Temporal scale and scopes of this report

2.3 Socio-economic and demographic trends in the Mediterranean: past, present and future

2.4 Major trends on environmental and climate change in the Mediterranean: Past, present and future

2.5 Past and current patterns and trends in migration and conflict in the Mediterranean

2.5.1 Diachronic responses to environmental change in the Mediterranean

2.5.2 Trends in conflicts and migrations: past and present

2.5.3 Future projected trends in conflicts and migrations

3 Threats to human life and livelihoods from climate and environmental change

Executive summary

3.1 Water

3.1.1 Introduction

3.1.2 Impacts of Climate Change on Water Availability

3.1.3 Human Pressures and Water Management

3.2 Food

3.2.1 Historical and projected climate trends and impacts to the Mediterranean's agriculture and fisheries sectors

3.2.2 Beyond direct climate change impacts: indirect climatic effects and consequences of non-climatic environmental change

3.2.3 Implications for livelihoods, migration, and conflict

3.3 Health

- 3.3.1 Interconnections between conflicts, human migration and environmental change on public health
- 3.3.2 *Current and Future health pressures caused by climate change, migration and conflicts in the Mediterranean*
- 3.3.3 *Intersectional Vulnerability*
- 3.4 Coasts
 - 3.4.1 *Environmental and climate change impacts*
 - 3.4.2 *Current and future socioeconomic pressures*
- 3.5 Ecosystems
 - 3.5.1 *Historical and projected climate trends and impacts to the Mediterranean's ecosystems*
 - 3.5.2 *Beyond direct climate change impacts: indirect climatic effects and consequences of non-climatic environmental change*
 - 3.5.3 *Implications for livelihoods, migration, and conflict*
- 3.6 Energy
- 3.7 Interactions between sectors

4 Key challenges for security: Conflict and cooperation in the Mediterranean

Executive summary

- 4.1 Geopolitics, security risks and conflicts in the Mediterranean region
- 4.2 The interaction between environmental change and conflict: empirical foundations
- 4.3 Climate and conflict projection
- 4.4 Conflict and migration
- 4.5 Conflict, climate hazards, vulnerability and adaptation
- 4.6 Conflict resolution, climate governance and environmental peacebuilding

5 Understanding the Environment and Migration Nexus in the Mediterranean

Executive summary

- 5.1 Central concepts and frameworks on environmental migration
 - 5.1.1 *Conceptual framework*
 - 5.1.2 *Different types of environmental stressors and their impacts on populations*
 - 5.1.3 *The role of contextual effects and co-stressors*
 - 5.1.4 *The IPCC Risk framework*
- 5.2 Empirical evidence on environmental migration in the Mediterranean
 - 5.2.1 *Northern Africa and Sahel*
 - 5.2.2 *Middle East*
 - 5.2.3 *Southeastern Europe*
 - 5.2.4 *Southern Europe*
- 5.3 Trajectories and Destinations of mobile populations
 - 5.3.1 *Environmental changes and urbanization processes*
 - 5.3.2 *Regional migration towards Mediterranean countries*
- 5.4 Projecting environmental impacts on migration flows in the future
- 5.5 The consequences of environmental migration: Adaptation and maladaptation

6 Environmental Change-Conflict-Migration-Nexus

Executive summary

- 6.1 Complexity of interactions between environmental change, migration and conflict
- 6.2 Governance of environmental change, migration and conflict in the Mediterranean
- 6.3 Legal frameworks and regimes to govern environmental migration
- 6.4 Migration, and place-based vulnerabilities
- 6.5 Migration environment and intersectional aspects

7 Knowledge Gaps and Strategies to Address Them

Executive summary

- 7.1 Introduction
- 7.2 Mechanisms and Pathways affecting the climate-migration-conflict nexus
- 7.3 Mediterranean Challenges: Diversity, Instability, and the Perils of Securitisation
- 7.4 Methodological Issues

- 7.4.1 *Interdisciplinary and multidimensional research*
- 7.4.2 *Contextual complexities: Multiple historical, regional, cultural contexts and individual stories*
- 7.4.3 *From environmental conflict to environmental justice?*
- 7.4.4 *Data availability and reliability*
- 7.4.4 *Diverse methodologies and longitudinal and comparative studies*
- 7.5 Rethinking the climate-migration-conflict Nexus
 - 7.5.1 *Re-assessing the frame: 'Threat Multiplier' framework and blind spots*
 - 7.5.2 *Human security and climate change*
 - 7.5.3 *Re-conceptualising the nexus*
